Your tower plan

forge

Sportsroyals Power Tower YTA03 · 4 training days a week + a daily Spine Reset

Every day

Spine Reset · 10 min

1	**Cat–camel**	×6 slow
2	**McGill curl-up**	5-3-1 (8–10 s holds)
3	**Side plank**	3 × 10 s each side
4	**Bird dog**	5-3-1 (8–10 s holds)
5	**Dead hang**	25 s (optional)

Walk: build to 2–3 × 10–15 min a day

Never in the first hour after waking — discs are most vulnerable then.

Back check

Traffic light, every morning

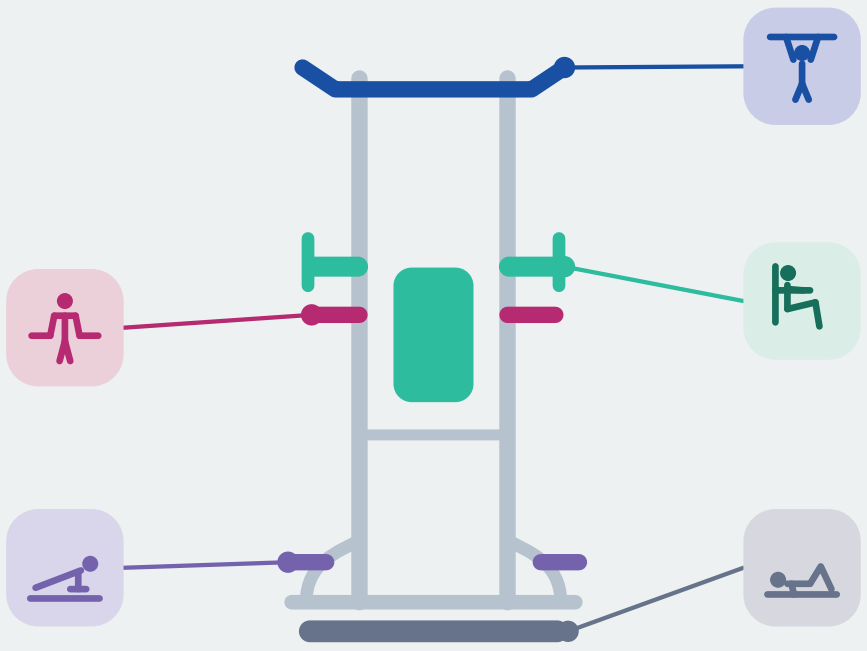

Green
Train as planned.

Yellow
Lighter day: the app trims ~40%, no knee raises.

Red, or anything down a leg
Spine Reset + walk only.

Your stations

Colour-coded, like the app

Pull-up bar
9 heights. Use the angled ends. Strict reps; step down, never drop.

Dip handles
Upper arms to parallel, legs still.

Knee-raise station
Back flat on the pad, 2 s up / 2 s down, zero swing.

Push-up handles
One straight line, glutes on.

Floor + mat
Spine work and legs.

Training days 4 a week, rotating

1 Upper A
Pull day
- Pull-ups
- Dips
- Rows
- Push-ups
- Knee raises
- Dead hang

2 Lower A
Legs + trunk
- Squat ladder
- Bridges / hip thrusts
- Leg curls
- Calves
- Plank
- Side plank

3 Upper B
Push day
- Pike / handstand ladder
- Push-ups
- Easy pull-ups
- Easy dips + rows
- L-sit

4 Lower B
Legs + trunk
- Lighter squats
- Bridges
- Single-leg RDL
- Calves
- Dead bug
- Suitcase carry

Two sessions in a day?

- Splitting a day into morning + evening = **fine** (same total work).
- A second full session = a different body region, **at least 6 h later**.
- **Never** both sessions with knee raises.

Tower checklist

- ✓ Flat floor + mat
- ✓ Check bolts weekly
- ✓ Max 150 kg
- ✓ No kipping or swinging (the tower wobbles)
- ✓ Knees bent behind you to clear the crossbar

See a doctor the same day if

- Numbness in the groin/saddle area
- New trouble peeing (can't go) or controlling bladder/bowels
- Weakness in both legs, or getting worse
- A foot that drags or slaps
- Fever, unexplained weight loss or severe night pain

Not medical advice — if symptoms persist, see a physio.
