
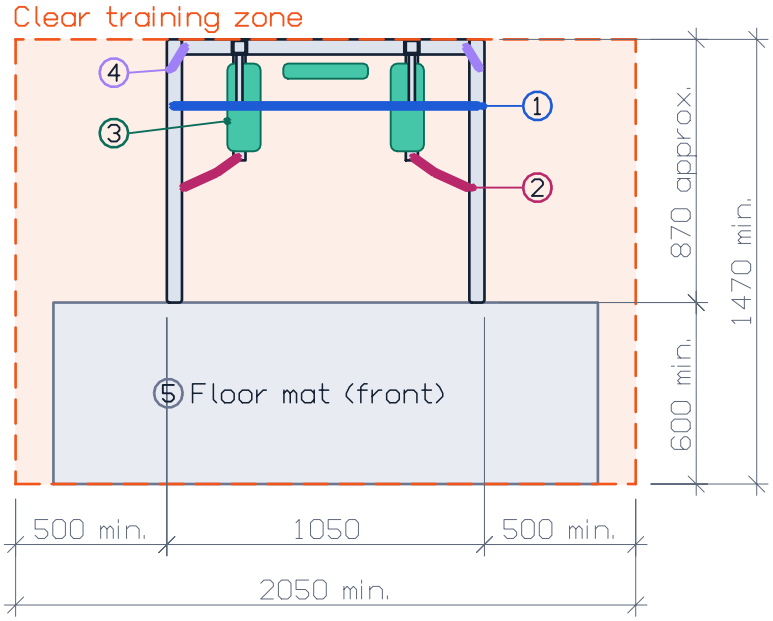
Front elevation 1:25

Bar at top setting (2200)
Bar at lowest (1450)
Clear training zone (min.)
Minimum ceiling



Plan with clear training zone 1:25

Notes

1. Keep the orange zone clear: min. 600 in front (rows, dips, push-ups), min. 500 each side.
2. Ceiling: bar height + approx. 300 head clearance, so approx. 2500 at the top setting.
3. Max. load 150 kg. Tower weight 20 kg. No anchor holes: flat, level floor; check bolts weekly.
4. Arm pads tilt 10° inward. Backrest height is fixed; its depth has 5 positions.
5. Bar: 9 heights from 1450 to 2200, approx. 94 apart. Rear crossbar at about knee height: bend your knees behind you on pull-ups.
6. approx. = estimated from product photos, not maker data. Check your own tower.
